EDUCATION

Bachelor of Science
Computer Science
Rajamangala University of
Technology Suvarnabhumi, Huntra
Campus
Cumulative GPA: 3.20

RELEVANT COURSEWORK

- Web Programming (Node.js)
- Computer Architecture & Hardware

KEY SKILLS

- React / TypeScript / JavaScript
- Next.js / Tailwind CSS / Responsive UI
- WebRTC / Pusher / Accessibility
- Gemini API / TensorFlow.js / COCO-SSD
- Git / GitHub / Postman / VS Code
- Basic Node.js
- PC Assembly & Troubleshooting
- Problem Solving / Teamwork

INTERESTS

- Frontend Development
- Web UI / Responsive Design
- Computer Hardware
- IT Support & Troubleshooting

CAREER OBJECTIVE

Computer Science student seeking an entry-level Frontend Developer or IT Support opportunity. Eager to apply React, TypeScript, responsive UI, and technical troubleshooting skills in real-world projects while continuing to grow in a collaborative software team.

QUALIFICATIONS

- Frontend foundation in React, TypeScript, JavaScript, HTML, and CSS.
- Able to build responsive interfaces for different screen sizes with a focus on clear usability.
- Hands-on use of Git, Postman, and VS Code for development and testing.
- Knowledge of PC assembly, hardware specification analysis, and technical troubleshooting.
- Problem-solving, patience, and effective teamwork.
- Collaborative project experience with Git/GitHub, including accessibility-aware UI, screen-reader support, and voice-based interactions.

PROJECTS

Nyeta - Real-Time Visual Assistance Platform (Collaborative Project)

- Collaborated on a platform for blind and visually impaired users combining AI visual assistance, object detection, document/currency recognition, and live volunteer video calls.
- Worked with Next.js, React, TypeScript, Tailwind CSS, WebRTC, Pusher, Gemini API, and TensorFlow.js with accessibility and screen-reader-friendly UI in mind.
- Contributed to eyes-free UX patterns using spoken feedback, TTS, haptics, and screen-reader-friendly interactions.

TripShare - Trip Expense Sharing Calculator

- Built a web app to manage trip members, record expenses, calculate fuel cost, and settle balances between participants.
- Added expense visualization and automatic settlement logic using React, TypeScript, and Vite.

ToDoList Website (2025)

- Full-stack task management app with Pending / In Progress / Completed states, a dashboard, and authentication.
- Tech Stack: React, TypeScript, PostgreSQL.

Personal Portfolio

- Developed a personal portfolio to present profile, skills, and projects using React, TypeScript, and Vite.
- Designed a responsive component-based interface for easier maintenance and future iteration.

ADDITIONAL ACTIVITY

- Participated in a digital marketing campaign competition.
